

An International Multidisciplinary Journal of
Y.B.N UNIVERSITY
METAINNOVATE

Author's Guidelines:

The manuscripts should be submitted in double-spaced typing (not 1-1.5 spaced typing), 12 points Times New Roman, on consecutively numbered pages of uniform size no greater than 21 x 30 cm with 3.0 cm margin on the left and 2.0 cm margins on top, bottom and right.

Each item should begin on a new page. 1. Manuscript cover page; 2. Title page containing the following, centered, starting at the top : title, names, affiliations and addresses of all authors.

Abstract

A concise and factual abstract is required. The abstract should state briefly the purpose of the research, the principal results and major conclusions. An abstract is often presented separately from the article, so it must be able to stand alone.

Keywords

Immediately after the abstract, provide a maximum of 5- 6 keywords.

Introduction

State the objectives of the work and provide an adequate background, avoiding a detailed literature survey or a summary of the results.

Subdivision - numbered sections

Divide your article into clearly defined and numbered sections. Subsections should be numbered 1.1 (then 1.1.1, 1.1.2,), 1.2, etc. (the abstract is not included in section numbering). Use this numbering also for internal cross-referencing: do not just refer to 'the text'. Any subsection may be given a brief heading. Each heading should appear on its own separate line.

METAINNOVATE

Material and methods

Provide sufficient detail to allow the work to be reproduced. Methods already published should be indicated by a reference: only relevant modifications should be described.

Results

Results should be clear and concise.

Discussion

This should explore the significance of the results of the work, not repeat them. A combined Results and Discussion section is often appropriate. Avoid extensive citations and discussion of published literature.

Conclusions

The main conclusions of the study may be presented in a short Conclusions section, which may stand alone or form a subsection of a Discussion or Results and Discussion section.

Acknowledgements

An acknowledgement in a separate section at the end of the article before the references.

References

Reference style: J. van der Geer, J.A.J. Hanraads, R.A. Lupton, The art of writing a scientific article, J. Sci. Commun. 163 (2010) 51–59.

Conflict of interest

All authors are requested to disclose any actual or potential conflict of interest including any financial, personal or other relationships with other people or organizations within three years of beginning the submitted work that could inappropriately influence, or be perceived to influence, their work.
