WEBNIAR

On

**“ Doubling of Farmers
Income Through
Horticulture ”**

THROUGH ONLINE MODE

Google Meet

DATE

**12 SEPTEMBER, 2023
(TUESDAY)**

Time: 11 am

The horticulture sector plays a key role in doubling farmers' income along with meeting the much-needed nutritional security. "The productivity of horticulture crops has increased by about 38.5% in the past 15 years and this consistent and rapid increase in production and

availability of horticultural crops shall translate into bridging the gap between the nutritional securities of the country vis-à-vis global average.

The premise of the strategy for doubling farmers' income is based on the following primary principles:

- i. Increasing total output across the agricultural sub-sectors through realising higher productivity
- ii. Rationalizing/reducing the cost of production
- iii. Ensuring remunerative prices in the agricultural produce
- iv. Effective risk management
- v. Adoption of sustainable technologies
