Lamp Lightening

- Program started at 11am with welcoming of guest then “lamp-lighting” was done by the eminent dignitaries.

Conclusion:-

- Every year World Pulses Day is celebrated on February 10 with an aim to spread awareness about the nutritional and environmental benefits of pulses as part of sustainable food production.

Theme of the year 2024 – “Pulses: nourishing soils and people”

- Pulses are leguminous plants that have nitrogen fixing properties which can contribute to increase the soil fertility and have a positive impact on the environment. It also improves the physical condition of the soil like soil aeration, water holding capacity by increasing microbial population, moisture retention.
