Computational mathematics and algorithms, use of data science in specific fields like finance, health and engineering, cryptography and mathematical logic and foundations.

17. Physical and Chemical Sciences:

Specific branches of chemistry, interdisciplinary fields, new discoveries, advanced techniques and sustainable applications.

18. Quantum Physics, Biophysics and Cosmology:

Physics and Universe, practical applications in technology and medicine and quantum biology.

19. Eco-Tourism and Economic Development:

Relationship between conservation and local economies, community-based ecotourism, economic benefits for local populations and alternative revenue streams.

20. Language and Literature:

Intersection of language and technology, evolution of language and literature, new literary forms, contemporary and global trends.

21. Computer Aided drug design

**** Ph.D. related topics for all streams or any other topic.**

About YBN University, Namkum, Rajaulatu, Ranchi

YBN University is a state-private university in the State of Jharkhand, created by the Govt. of Jharkhand. The University is a renowned educational institution dedicated to nurturing young minds and empowering them with knowledge, skills, and values. Our institution has a rich history of academic excellence and a commitment to fostering holistic development in students. It offers students the ability to tailor their studies to meet their needs to face global challenges. It epitomizes creativity, innovation, and correctness. We are committed to providing quality education and contributing to societal transformation by producing leaders, innovators, and responsible citizens.

Mission

The mission of YBN University is to engage in outstanding scholarship that makes a major contribution to society and to produce groundbreaking research.

Vision

We believe in a remarkable tomorrow, in doing our best and supporting others to do theirs. Our founders knew professional and industrial environments constantly vary and that universities needed to equip their students with the skills to adapt and lead positive change for the future.

About the Conference

This **International Conference on Multidisciplinary Research in AI and Future- Focused Research** aims to gather academics and industry experts to explore the impact and advancement of Artificial Intelligence across various fields like healthcare, sustainability, science, etc. The goal of the conference is to foster collaboration for knowledge sharing, discussing advancement in future focused research and addressing complex global challenges across domains

Mission

The conference aims to bridge gaps between AI research and future focused research in multidisciplinary areas and real-world needs.

Vision

The conference aims to encourage research and innovation solutions for a sustainable future.
